

## Protected IP Certificate

**Idea:** Clinical Prompt Injection Protocol <sup>IP</sup>

**Created At:** Jun 9, 2026, 3:54:45 PM Eastern Time

**Description:** CPIP is an AI Safety framework designed to improve reasoning reliability, behavioral control, and governance alignment in high-risk healthcare AI environments. CPIP is a structured prompt-engineering and orchestration framework developed to reduce hallucinations, constrain unsafe reasoning behaviors, and improve contextual consistency in Large Language Models (LLMs) operating within clinical-style workflows and decision-critical environments. The framework applies layered prompt architecture, behavioral guardrails, structured reasoning constraints, and Python-oriented system design principles to support safer AI interaction patterns in healthcare-related simulation scenarios.

Congratulations. Your IP is Now Protected. As a result, you have the exclusive right to display the Official The Instant IP Certification Mark <sup>IP</sup> whenever using your respective expression of IP. This Certification Mark usage is granted to the creator indefinitely however, only for each unique IP expression which is protected via Instant IP<sup>IP</sup>. For more information, please reference the official statement below.

The superscript symbol <sup>IP</sup> listed is known as the unique certification mark created and owned by Instant IP<sup>IP</sup>. Its use signifies that the corresponding expression (words, phrases, chart, graph, etc.) has been protected by Instant IP<sup>IP</sup> via smart contract. Instant IP<sup>IP</sup> is designed with the patented smart contract solution (US Patent: 11,928,748) which creates an immutable time-stamped first layer and fast layer identifying the moment in time an idea is filed on the blockchain. This solution can be used in defending intellectual property protection. Infringing upon the respective intellectual property i.e. <sup>IP</sup> is subject to and punishable in a court of law. Please see Terms and Conditions for additional information.
